DURLON® 7910
Compressed Non-Asbestos Gasket Material

Certified to NSF/ANSI 61

Application:

DURLON® 7910 is a good quality general service gasket for applications where an NSF/ANSI 61 Certified gasket material is required. It is suitable for potable water, steam, oil, water, mild alkalis and acids, hydrocarbons and solvents; and for applications in the water treatment and reclamation, wastewater and plumbing industries.

Composition:

DURLON® 7910 is a compressed fiber sheet gasket material that was specially developed to meet the requirement of NSF/ANSI 61 for potable water applications. It contains high strength mineral fibers bonded with nitrile (NBR) synthetic rubber.

Typical Properties:

Color: ................................................................. White, branded  
Density: ............................................................. 106 lbs/ft³ (1.7 g/cm³)  
Tensile strength across grain, ASTM F152: ........................ 1,600 psi (11 MPa)  
Compressibility @ 5000 psi, ASTM F36: ......................... 9 to 19%  
Recovery ASTM F36: ........................................... 40%  
Creep Relaxation, ASTM F38: ...................................... 25%  
Temperature,  
   Short Term Maximum: ........................................... 700ºF (371ºC)  
   Continuous Operating: ............................................. -100 to 500ºF (-73 to 260ºC)  
Pressure, max: .................................................... 1200 psig (83 bar)  
   (at ambient temperature)  
Fluid Resistance – ASTM F146  
   IRM 903 Oil 5h/300ºF (149°C)  
      Thickness Increase: ......................................... 0 to 15%  
      Weight Increase: ............................................. 15% Maximum  
   ASTM Fuel B 5h/70ºF (21°C)  
      Thickness Increase: ......................................... 0 to 10%  
      Weight Increase: ............................................. 12% Maximum  
Sealability  
   Gas Permeability, ASTM F2378: ................................. 0.05 cc/min  
   Flexibility, ASTM F147: .......................................... 10x  
   ASTM F104: ...................................................... F712120-A9B3E22K5L151M5  

Note: ASTM properties based on 1/16” sheet thickness except ASTM F38, which is based on 1/32” sheet thickness. This is a general guide only and should not be the sole means of accepting or rejecting this material. The data listed here falls within the normal range of product properties but should not be used to establish specification limits nor used alone as the basis of design.

**Standard Testing**

Tests are standard ASTM procedures. There are variations that exist between laboratories and in results which can mislead. Specific information on any test results and the procedure used is available upon request.

**Testing vs Operating Conditions**

All test methods provide a standardized procedure to measure specific effects under controlled conditions. The results of any test are not intended to have any direct correlation with service conditions.
